1) Histogram shows the population density distribution
   - True
   - False

Correct Answer: True

2) Bins in a histogram are a
   - Filter Criteria
   - Number of Data Segments
   - Histogram Style
   - Axis Length

Correct Answer: Number of Data Segments

3) The kwargs parameter does
   - Specifies mandatory attributes
   - Combines multiple sets of data
   - Named parameter aggregation

Correct Answer: Named parameter aggregation

4) How do you draw overlapping multiple histograms?
   - Using multiple hist() invocations on the same figure
   - Using the multihist() function
   - Use the hist2D() function

Correct Answer: Using multiple hist() invocations on the same figure

5) Bins in a 2D histogram are for representing 2D intersections of value ranges
   - True
   - False

Correct Answer: True

6) Which method plots an image from a pixel matrix
   - plotImage ()
   - image ()
   - imshow ()
   - imagePlot ()

Correct Answer: imshow()
